## Storage & Warehousing

Many times, equipment needs to be ordered much before the intended install, or the actual delivery from the manufacturer cannot be coordinated with the install date. To address these situations we offer industrial outdoor storage and indoor warehousing. Your equipment can be shipped directly to us, stored, and hauled to your jobsite the day of your install on one of our boom trucks or hauled by one of our tractors, depending on the size of your equipment and the crane required for your job.

Below is a list of equipment we store everyday for our customers. If you don't see your equipment listed please give our office a call to discuss accommodations. (Please note: A Quick Pick Crane Service, Inc. is not responsible for determining if equipment is stored outside or inside, it is the customer's responsibility to provide this information to us).

### Indoor Storage For:

- Boilers
- Liebert Units
- Sensitive Computer Room Equipment
- Heat Exchangers
- Air Handlers
- Economizers
- Heat Pumps
- UPS Battery Back Ups
- Batteries
- Switch Gear
- ATS Switches
- Adapter Curbs

### Outdoor Storage For:

- RTU's
- Condensers
- Chillers
- Vibration Isolation Curbs
- Generators
- Insulated Pipe
- Steel
- Fans

## Estimating

Bidding a project? Not sure how to measure for a crane? Let us help you plan for the right equipment. Our professional estimators will come to your site to measure and discuss your project with you. Their collaboration will help you plan for the right crane, helping to make your bid and project more cost effective.

- 17 Ton National Boom Trucks

## Solutions Beyond Our Current Capabilities

Through the years in our industry we've established many contacts and partnerships that allow us to acquire equipment beyond our current capabilities. If we do not have the equipment to complete your job we may be able to purchase or rent the right equipment if it is mutually beneficial to our customers and us. If you are looking to buy a crane for your company we can open the doors to crane dealers and provide financing options. Instead of just a crane rental house, consider us your companies hoisting and crane consultants.

## Crane Rental

At Quick Pick, crane rental and service is our specialty. It's how we started and what has fueled our successful growth. We started with one boom truck and have expanded our fleet to include:

- Multiple Boom Trucks
- All-Terrain Hydraulic Cranes
- Rough Terrain Cranes
- Tower Cranes
- Capabilities to Acquire Crawler Cranes

Having a wide variety of cranes, different sizes and different types allows us to provide our customers with the correct equipment for their projects.

Our operators are experienced Local 478 Union operators. All of our cranes are well maintained and fully insured and we have the capability to provide crane rental services throughout Connecticut, New York, Rhode Island, and Massachusetts.

When deciding which crane is the right one for your job there are 2 important factors we take into account:

1. Safety
2. Cost Efficiency

We make sure that the crane we send you has enough capacity for your pick according to the manufacturer's load chart. If it doesn't, we send you a larger crane or we don't do the job. No if's, and's, or but's; safety is never compromised.

On the other hand we will never send you (or at least charge you for) a crane too big for your job. Crane service is a big expense, and we are not interested in over charging our customers. Cost efficiency is a major factor in determining the crane for your job.

Sometimes a bigger crane might be sent to your site (so long as it's dimensions and weight are not a problem) to get your job done. But you will only be charged the rate of the crane needed to do your particular job. That's our policy; with Quick Pick you pay for what you need.

If you understand how to correctly measure for a crane, our office will help you determine the size of the crane needed to safely and efficiently complete the job. If you're not sure how to measure for a crane or might have a particular tricky scenario, our expert estimators will come to your site to assist you.

## Boom Truck Rental

Our business was started with 1 boom truck and has now grown to 10! We have operators and equipment licensed and available to travel in CT, NY, RI, and MA.

Our company got its name by doing "Quick Picks" with our boom trucks. When we first started in the business, contractors had no choice but to rent a crane for 8 hours, regardless of how long the job actually took. Understanding that many contractors only had a few picks or much less than 8 hrs of crane time, we implemented the industries first half-day minimum charge. It worked perfectly for HVAC contractors who had 1 or 2 RTU's to pick or roofing contractors who had 1 load of material to hoist. The boom truck was perfect for these tasks because of its relatively small size and its quick set up/break down. It allowed us to quickly get in and out of multiple jobs in a day, and allowed our customers to save money on crane costs.

Many of our boom trucks have deck space on them that allows us to receive, store, and deliver our customers pieces without the necessity of additional trucking costs, yet another way our boom trucks save our customers money. We offer both outdoor storage and indoor warehousing (for pieces that require it)

## Rigging

Got heavy equipment that needs to be placed in tight locations? We've got the expertise, equipment, cranes, and personnel to complete complicated rigging jobs.

Whatever the job calls for to set your equipment in place we can handle. Through windows or garages, up stairs or down, even if we have to remove walls or cut holes through a roof, nothing is impossible. And we can service customers in Connecticut, New York, Rhode Island, and Massachusetts.

With our state of art equipment and creative, experienced rigging staff, we work with customers to come up with safe cost effective solutions. Quick Pick's riggers take great care in protecting your equipment and its surrounding areas.

Equipment we can rig includes but is not limited to:

- Art Work
- Sculptures
- Machinery
- Presses
- Generators
- Boilers
- Chillers
- Switch Gear
- Transformers

## Hauling & Trucking

At Quick Pick we provide turnkey solutions for our customers. In addition to hoisting with our crane service and setting heavy equipment with our rigging service we also provide storage and hauling services. We have the resources to receive, store, deliver, hoist, and rig your equipment into place.

No matter the weight or size of your equipment we have the knowledge of state road laws and the tools to deliver your equipment quickly and safely

We have a variety of hauling equipment including:

- Trailers
- Flatbeds
- High Flats
- Drop Decks
- Tilt Body Flatbeds
- Tilt Trailers
- Double Drop Trailers
- Low Beds
- Stretch Trailers

Some of the items we receive, store, and deliver for our customers:

- Art Work
- Sculptures
- HVAC Equipment
- Mechanical Equipment
- Electrical Equipment
